

INCIDENT, INJURY, TRAUMA & ILLNESS POLICY

The health and safety of all staff, children, families and visitors to our Service is of the utmost importance. We aim to reduce the likelihood of incidents, illness, accidents and trauma through implementing comprehensive risk management, effective hygiene practices and the ongoing professional development of all staff to respond quickly and effectively to any incident or accident.

We acknowledge that in early education and care services, illness and disease can spread easily from one child to another, even when implementing the recommended hygiene and infection control practices. Our Service aims to minimise illnesses by adhering to all recommended guidelines from relevant government authorities regarding the prevention of infectious diseases and adhere to exclusion periods recommended by the Australian Government National Health and Medical Research Council (NHMRC) and the Public Health Unit.

When groups of children play together and are in new surroundings accidents and illnesses may occur. Our Service is committed to effectively manage our physical environment to allow children to experience challenging situations whilst preventing serious injuries.

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY		
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.
2.2	Safety	Each child is protected.
2.2.1	Supervision	At all times, reasonable precautions and adequate supervision ensure children are protected from harm and hazard.
2.2.2	Incident and emergency management	Plans to effectively manage incidents and emergencies are developed in consultation with relevant authorities, practiced and implemented.
2.2.3	Child Protection Child Safety and Protection	Management, educators and staff are aware of their roles and responsibilities to identify and respond to every child at risk of abuse or neglect. Management, educators and staff are aware of their roles and responsibilities regarding child safety, including the need to identify and respond to every child at risk of abuse or neglect

EDUCATION AND CARE SERVICES NATIONAL LAW AND NATIONAL REGULATIONS	
S. 2A	Paramount consideration - safety, rights and best interests of children

PURPOSE

Our service has a duty of care to respond to and manage illnesses, accidents, incidents, and trauma that may occur at the Service to ensure the safety and wellbeing of children, educators, staff and visitors. This policy will guide educators and staff to manage illness and prevent injury and the spread of infectious diseases and provide guidance of the required action to be taken in the event of an incident, injury, trauma or illness occurring when a child is educated and cared for.

SCOPE

This policy applies to children, families, educators, staff, the approved provider, nominated supervisor, management, students, volunteers and visitors of the Service.

IMPLEMENTATION

Under the *Education and Care Services National Regulations*, an approved provider must ensure that policies and procedures are in place for incident, injury, trauma and illness and take reasonable steps to ensure policies and procedures are followed. (ACECQA, 2025). In the event of an incident, injury, trauma or illness all staff will implement the guidelines set out in this policy and associated procedure to adhere to legislative requirements under the National Law and National Regulations and inform the regulatory authority as required for notifiable incidents.

Our Service implements risk management planning to identify any possible risks and hazards to our learning environment and practices. Where possible, we have eliminated or minimised these risks as is reasonably practicable.

Our Service implements procedures as stated in the Staying healthy: [Preventing infectious diseases in early childhood education and care services \(6th Edition\)](#) as part of our day-to-day operation of the Service. We are guided by explicit decisions regarding exclusion periods and notification of any infectious disease by the *Australian Government- Department of Health* and local Public Health Units in our jurisdiction under the Public Health Act.

DEFINITION OF A SERIOUS INCIDENT

Regulations require the approved provider or nominated supervisor to notify the regulatory authority within 24 hours of any serious incident at the Service through the [NQA IT System](#)

A serious incident (Reg. 12) is defined as any of the following:

- a) the death of a child:
 - (i) while being educated and cared for by an Education and Care Service or
 - (ii) following an incident while being educated and cared for by an Education and Care Service.
- (b) any incident involving serious injury or trauma to, or illness of, a child while being educated and cared for by an Education and Care Service, which:
 - (i) a reasonable person would consider required urgent medical attention from a registered medical practitioner or
 - (ii) for which the child attended, or ought reasonably to have attended, a hospital. For example: whooping cough, broken limb and anaphylaxis reaction
- (c) any incident or emergency where the attendance of emergency services at the Education and Care Service premises was sought, or ought reasonably to have been sought (e.g.: severe asthma attack, seizure or anaphylaxis)
- (d) any circumstance where a child being educated and cared for by an Education and Care Service
 - (i) appears to be missing or cannot be accounted for *or*
 - (ii) appears to have been taken or removed from the Education and Care Service premises in a manner that contravenes these regulations *or*
 - (iii) is mistakenly locked in or locked out of the Education and Care Service premises or any part of the premises.

A serious incident should be documented as an *Incident, Injury, Trauma and Illness Record* as soon as possible and within 24 hours of the incident, with any evidence attached.

PHYSICAL ABUSE/SEXUAL ABUSE

Physical abuse refers to the use of physical force against a child that results in harm to the child.

Sexual abuse is any sexual behaviour including grooming behaviour, between an adult and a child.

Any incident or allegation of physical or sexual abuse to a child whilst being educated and cared for at our Service, must also be notified to the regulatory authority within 24 hours of the approved provider being aware of the incident or allegation. (ACECQA, 2025)

INJURY, INCIDENT OR TRAUMA

In the event of any child, educator, staff, volunteer or visitor having an accident at the Service, an educator who holds an approved first aid qualification will attend to the person immediately.

Adequate supervision will be provided to all children attending the Service.

Any workplace incident, injury or trauma will be investigated, and records kept as per WHS legislation and guidelines. An *Incident Injury Report Register* will be completed to assist with a review of practices following an incident or injury at the Service, including an assessment of areas for improvement.

All staff and educators are required to follow the procedures outlined in our *First Aid Policy* and First Aid Procedure.

MISSING OR UNACCOUNTED FOR CHILD

At all times, reasonable precautions and adequate supervision is provided to ensure children are protected from harm or hazards. However, if a child appears to be missing or unaccounted for, removed from the Service premises that breaches the National Regulations or is mistakenly locked in or locked out of any part of the Service, a serious incident notification must be made to the Regulatory Authority.

A child may only leave the Service in the care of a parent, an authorised nominee named in the child's enrolment record, or a person authorised by a parent or authorised nominee or because the child requires medical, hospital or ambulance care or other emergency.

Educators must ensure that:

- the attendance record is regularly cross-checked to ensure all children signed into the service are accounted for
- children are supervised at all times
- visitors to the service are not left alone with children at any time

Should an incident occur where a child is missing from the Service, educators and the Nominated Supervisor will:

- attempt to locate the child immediately by conducting a thorough search of the premises (checking any areas that a child could be locked into by accident)
- cross check the attendance record to ensure the child hasn't been collected by an authorised person and signed out by another person
- if the child is not located within a 10-minute period, emergency services will be contacted, and the Approved Provider will notify the parent/s or guardian
- continue to search for the missing child until emergency services arrive whilst providing supervision for other children in care
- provide information to Police such as: child's name, age, appearance, (provide a photograph), details of where the child was last sighted.

The Approved Provider is responsible for notifying the Regulatory Authority of a serious incident within 24 hours of the incident occurring.

HEAD INJURIES

It is common for children to bump their heads during everyday play; however, it is difficult to determine whether the injury is serious or not. Any knock to the head will be documented on an Incident Report, First Aid trained educators will assess the child and administer any First Aid required and the family will be notified of the injury via phone call.

Emergency services will be contacted immediately on 000 if the child:

- has sustained a head injury involving high speeds or fallen from a height (play equipment)
- loses consciousness
- seems unwell or vomits several times after hitting their head

TRAUMA

Trauma is defined as the impact of an event or a series of events during which a child feels helpless and pushed beyond their ability to cope. There are a range of different events that might be traumatic to a child, including accidents, injuries, serious illness, natural disasters (bush fires), assault, and threats of violence, domestic violence, neglect or abuse and war or terrorist attacks. Parental or cultural trauma can also have a traumatising effect on children. This definition firmly places trauma into a developmental context:

“Trauma changes the way children understand their world, the people in it and where they belong.”

(Australian Childhood Foundation, 2010).

Trauma can disrupt the relationships a child has with their parents, educators and staff who care for them. It can transform children’s language skills, physical and social development and the ability to manage their emotions and behaviour.

Behavioural response in babies and toddlers who have experienced trauma may include:

- Avoidance of eye contact
- Loss of physical skills such as rolling over, sitting, crawling, and walking
- Fear of going to sleep, especially when alone
- Nightmares
- Loss of appetite
- Making very few sounds
- Increased crying and general distress
- Unusual aggression
- Constantly on the move with no quiet times
- Sensitivity to noises.

Behavioural responses for pre-school aged children who have experiences trauma may include:

- new or increased clingy behaviour such as constantly following a parent, carer or staff around
- anxiety when separated from parents or carers
- new problems with skills like sleeping, eating, going to the toilet and paying attention
- shutting down and withdrawing from everyday experiences
- difficulties enjoying activities
- being jumpier or easily frightened
- physical complaints with no known cause such as stomach pains and headaches
- blaming themselves and thinking the trauma was their fault.

Children who have experienced traumatic events often need help to adjust to the way they are feeling. When parents, educators and staff take the time to listen, talk, and play they may find children begin to say or show how they are feeling. Providing children with time and space lets them know you are available and care about them.

It is important for educators to be patient when dealing with a child who has experienced a traumatic event. It may take time to understand how to respond to a child's needs and new behaviours before parents, educators and staff are able to work out the best ways to support a child. It is imperative to realise that a child's behaviour may be a response to the traumatic event rather than just 'naughty' or 'difficult' behaviour.

EDUCATORS CAN ASSIST CHILDREN DEALING WITH TRAUMA BY:

- observing the behaviours and expressed feelings of a child and documenting responses that were most helpful in these situations
- creating a 'relaxation' space with familiar and comforting toys and objects children can use when they are having a difficult time
- having quiet time such as reading a story about feelings together
- trying different types of play that focus on expressing feelings (e.g. drawing, playing with play dough, dress-ups and physical games such as trampolines)
- helping children understand their feelings by using reflecting statements (e.g. 'you look sad/angry right now, I wonder if you need some help?').

There are a number of ways for parents, educators and staff to reduce their own stress and maintain awareness, so they continue to be effective when offering support to children who have experienced traumatic events.

STRATEGIES TO ASSIST FAMILIES, EDUCATORS AND STAFF TO COPE WITH CHILDREN'S STRESS OR TRAUMA MAY INCLUDE:

- taking time to calm yourself when you have a strong emotional response. This may mean walking away from a situation for a few minutes or handing over to another educator or staff member if possible
- planning ahead with a range of possibilities in case difficult situations occur
- remembering to find ways to look after yourself, even if it is hard to find time or you feel other things are more important. Taking time out helps adults be more available to children when they need support
- using supports available to you within your relationships (e.g., family, friends, colleagues)
- identifying a supportive person to talk to about your experiences. This might be your family doctor or another health professional

- accessing support resources- BeYou, Emerging Minds.

Living or working with traumatised children can be demanding so it is important for all educators to be aware of their own responses and seek support from management when required.

ILLNESS MANAGEMENT

To reduce the transmission of infectious illness, our Service implements effective hygiene and infection control routines and procedures from [Staying healthy: Preventing infectious diseases in early childhood education and care services- 6th Edition.](#)

Practising effective hygiene helps to minimise the risk of cross infection within our Service include:

- immunisation- for children and adults
- respiratory hygiene- limiting airborne germs and the transmission of respiratory diseases. Educators model good hygiene practices and remind children to cough or sneeze into their elbow or use a disposable tissue and wash their hands immediately with soap and water or use hand sanitiser after touching their mouth, eyes or nose.
- hand hygiene- handwashing techniques are practised by all educators and children routinely using soap and water before and after eating, after changing children's nappies, when using the toilet and drying hands thoroughly with paper towel.
- wearing PPE- gloves and masks to provide a protective barrier against germs
- environmental strategies- cleaning with specific products after any spills of body fluids (urine, faeces, vomit, blood, breastmilk); All surfaces including bedding (mat, cushions) used by a child who is unwell, will be cleaned with soap and water and then disinfected.
- nappy changing and toileting- Infection control practices including hand hygiene and proper cleaning and disinfection procedures are implemented when children's nappies are changed. Children are helped and/or supervised using the toilet and washing their hands
- exclusion – children, educators and other staff who show symptoms of infectious disease are excluded from the Service and will require a medical clearance from a registered medical practitioner prior to returning.

CHILDREN ARRIVING AT THE SERVICE WHO ARE UNWELL

Management will not accept a child into care if they:

- have a diagnosed contagious illness or infectious disease without a medical clearance [specific exclusion periods may apply]

- have a temperature above 38.0°C
- have had diarrhoea and/or vomiting in the last 24 hours, or in an outbreak, 48 hours.
- have been given medication for a temperature/illness in the last 24 hours to arriving at the Service or for pain relief without a letter from a GP (for example: Panadol, Nurofen)

IDENTIFYING SIGNS AND SYMPTOMS OF ILLNESS

Early childhood educators and management are not doctors and are unable to diagnose an illness or infectious disease, however, as our educators are familiar with the children in their care, they will watch for symptoms of sickness. If a child becomes ill whilst at the Service, educators will respond to their individual symptoms of illness and provide comfort and care.

Educators will closely monitor the child focusing on the symptoms displayed and how the child behaves and be alert to the possibility of symptoms that may suggest the child is very sick and needing urgent medical assistance.

Educators will:

- understand the differences between *concerning and serious symptoms*
- if any *serious symptoms* are observed (breathing difficulties, drowsiness or unresponsiveness, looking pale or blue or feeling cold)
 - an ambulance will be called immediately
- if any *concerning symptoms* are observed (lethargy, fever, poor feeding, new rash, poor urine output, irritation or pain or sensitivity to light) educators will:
 - monitor the child carefully
 - call parents/carers
 - discuss symptoms with parents/carers and help them decide whether the child needs to see a doctor
- educators will monitor the child and will consider calling an ambulance if:
 - any concerning symptoms become severe
 - the child gets worse very quickly
 - there are multiple concerning symptoms.

(Staying healthy, 6th Edition, 2024)

In the event of any child requiring ambulance transportation and medical intervention, a serious incident will be reported to the regulatory authority (Reg. 12) by the approved provider within 24

hours.

If the child has symptoms that suggest they are sick and they are not well enough to enjoy activities, they should go home and parents/caregivers will be contacted. The child will be cared for in an area that is separated from other children in the Service to await pick up from their parent/guardian or emergency contact person. A child who is displaying symptoms of a contagious illness or virus (vomiting, diarrhoea, fever) will be moved away immediately from the rest of the group and supervised until he/she is collected by a parent or emergency contact person. A child who displays symptoms of a contagious illness or virus (vomiting, diarrhoea, fever) will be excluded from the service for 24 hours from the last vomit, loose bowel or fever. If the centre is experiencing an 'outbreak' the exclusion period is 48 hours.

SYMPTOMS INDICATING ILLNESS MAY INCLUDE:

- lethargy and decreased activity
- difficulty breathing
- fever (temperature more than 38°C)
- headaches
- poor feeding
- poor urine output/ dark urine
- a stiff neck, irritability or sensitivity to light
- new red or purple rash
- pain
- diarrhoea
- vomiting
- discharge from the eye or ear
- skin that displays rashes, blisters, spots, crusty or weeping sores
- loss of appetite
- difficulty in swallowing or complaining of a sore throat
- persistent, prolonged or severe coughing

HIGH TEMPERATURES OR FEVERS

Children get fevers or temperatures for all kinds of reasons. Most fevers and the illnesses that cause them last only a few days. Recognised authorities suggest a child's normal temperature will range between 36.5°C and 38.0°C.

WHEN A CHILD DEVELOPS A HIGH TEMPERATURE OR FEVER AT THE SERVICE

- For infants under 3 months old, parents/guardians will be notified immediately for any fever over 38°C for immediate medical assistance. If a parent is uncontactable, emergency contacts will be contacted. If family members are unable to be contacted and emergency medical assistance is required, the Service will follow the *Administration of First Aid Policy* and contact emergency services
- Educators will check a child's temperature if they think the child has a fever. If it is between 37.5°C and 37.9°C educators will retest within 30 minutes (records will be kept of time, date and temperature)
- Educators will notify parents when a child registers a temperature of 38°C or higher
- Educators will follow the *Illness Management Procedure* for methods to reduce a child's temperature or fever
- The child will need to be collected from the Service as soon as possible (within 30 minutes)
- Educators will monitor the child carefully to ensure their condition does not get worse and call an ambulance immediately if required
- Educators will complete an *Incident, Injury, Trauma and Illness* record and note down any other symptoms that may have developed along with the temperature (for example, a rash, vomiting, etc.).
- If a child is sent home from the service due to a fever, they must be excluded for a minimum of 24 hours from the time of their last recorded elevated temperature.

RESPIRATORY SYMPTOMS

Respiratory symptoms include cough, sneezing, runny or blocked nose and sore throat. It is not unusual for children to have five or more colds a year, and children in education and care services may have as many as 8–12 colds a year. A runny or blocked nose is a common symptom for many respiratory conditions or diseases which may be infectious such as a cold, influenza or COVID. Some causes, however, are not infectious such as allergies (hay fever).

As each child may have different symptoms of a respiratory illness, our Service will consider exclusion based on the severity of the symptoms and the child's behaviour. Children can become distressed and lethargic when unwell and should be at home with a parent or carer under close supervision.

A child will be excluded from the Service if:

- respiratory symptoms are severe, including a persistent wet or barking cough, difficulty breathing, or ongoing distress; or
- symptoms worsen throughout the day, becoming more frequent or more severe; or
- there is consistent thick green nasal discharge present; or
- the child displays additional concerning symptoms such as fever, lethargy, pain, or poor feeding.

DIARRHOEA AND VOMITING (GASTROENTERITIS)

Gastroenteritis is an illness of the digestive system that commonly causes diarrhoea, vomiting, and abdominal cramps. It can lead to dehydration due to fluid loss.

If a child develops diarrhoea and/or vomiting while at the Service, parents or an emergency contact will be notified to collect the child immediately.

An outbreak is defined as two or more children or staff experiencing diarrhoea and/or vomiting within a 2-day period. In this case, management will notify the local Public Health Unit and record all cases, including onset dates and duration of symptoms.

Children and staff with symptoms will be excluded from the Service until there has been no diarrhoea or vomiting for at least 24 hours. In the event of an outbreak, or if norovirus is confirmed, exclusion will extend to at least 48 hours after symptoms have ceased.

An *Incident, Injury, Trauma and Illness Record* must be completed as per regulations. Notifications for serious illnesses must be lodged with the regulatory authority and Public Health Unit.

NOTIFYING FAMILIES AND EMERGENCY CONTACT- SICKNESS OR INFECTIOUS ILLNESS

- All emergency contacts must be able to collect an unwell child within 30 minutes of notification. Where this is not possible, families must make every effort to arrive as soon as practicable and remain contactable by phone should the child's condition worsen.
- Parents/guardians will be notified as soon as practicable, and no later than 24 hours, of any illness, injury, or trauma occurring at the Service.
- Families will be informed of any outbreak of an infectious disease at the Service to assist in reducing the spread.

- When a child is diagnosed with an infectious illness, the Service will follow recommended exclusion periods in accordance with the Public Health Unit and *Staying healthy: Preventing infectious diseases in early childhood education and care services* (6th Edition, 2024).
- In some circumstances, the Service may require a child to seek medical advice to confirm whether an illness or condition is infectious. This may include, but is not limited to, symptoms such as rashes, unexplained fevers, or other signs of possible infectious disease. Where requested by the Service, the child must obtain medical clearance from a registered medical practitioner prior to returning.
- Information regarding exclusion periods is provided to families in the Family Handbook and relevant policies.

THE APPROVED PROVIDER/MANAGEMENT/NOMINATED SUPERVISOR/RESPONSIBLE PERSON AND EDUCATORS WILL ENSURE:

- that obligations under the Education and Care Services National Law and Education and Care Services National Regulations are met and child's safety and wellbeing are prioritised at all times
- educators, staff, students, visitors and volunteers have knowledge of and adhere to this policy and associated procedure and are advised on how and where the policy can be accessed
- every reasonable precaution is taken to protect children from harm and hazards likely to cause injury
- all educators, staff and students are aware of their mandatory reporting obligations and responsibilities
- staff, educators, volunteers, and students adhere to the National Model Code and [Guidelines](#) and not use, or have access to, any personal electronic devices, including mobile phones or smart watches used to take images or videos when educating and caring for children at the Service
- each child's enrolment records include authorisations by a parent or person named in the record for the approved provider, nominated supervisor or educator to seek medical treatment for the child from a registered medical practitioner, hospital or ambulance service and if required, transportation by an ambulance service
- accurate attendance records are kept at all times
- parents or guardians are notified as soon as practicable and no later than 24 hours of the illness, accident, or trauma occurring
- any incident, injury, trauma, illness or allegation of physical or sexual abuse to a child whilst being educated and care for, is recorded as soon after the event as possible (within 24 hours)
- an *Incident, Injury, Trauma and Illness Record* is completed accurately and in a timely manner as soon after the event as possible (within 24 hours)
- if the incident, situation or event presents imminent or severe risk to the health, safety and wellbeing of any person present at the Service, or if an ambulance was called in response to the

emergency (not as a precaution) the regulatory authority will be notified within 24 hours of the incident

- the regulatory authority is notified of any allegation of physical or sexual abuse within 24 hours of the incident, or within 24 hours of the approved provider being aware of any incident or allegation using the NQA ITS incident form
- families are advised to keep their child home until they are feeling well and/or have received a medical clearance from a medical practitioner, and they have not had any symptoms for at least 24-48 hours (depending upon the illness and exclusion periods)
- children or staff members who are diagnosed with an illness or infectious disease may be excluded as per recommended exclusion periods and in some cases will be required to present a medical clearance from a medical practitioner.
- families are notified of any infectious disease circulating the Service within 24 hours of detection
- a child who has not been immunised will be excluded from the Service if a vaccine preventable disease is reported within the Service community and that child is deemed to be in danger of contracting the illness. Please refer to our *Dealing with Infectious Diseases Policy*
- families of a child with complex and chronic medical conditions will be notified in the event of an outbreak of an illness or infectious disease that could compromise their health
- families are notified to collect their child if they have vomited or had diarrhoea whilst at the Service
- first aid kits are suitably equipped and checked on a quarterly basis
- first aid kits are easily accessible when children are present at the Service and during excursions
- that the following qualified people are in attendance **at all times** the Service is providing education and care to children [Reg. 136]
 - at least one educator, staff member or nominated supervisor who holds a current ACECQA approved first aid qualification including emergency life support and CPR resuscitation
 - at least one educator, staff member or nominated supervisor of the Service who has undertaken current approved anaphylaxis management training
 - at least one educator, staff member or nominated supervisor of the Service who has undertaken current approved emergency asthma management training
- educators or staff who have diarrhoea or an infectious disease do not prepare food for others for at least 48 hours after the symptoms have resolved
- cold food is kept cold (below 5 °C) and hot food, (above 60°C) to discourage the growth of bacteria

- staff and children always practice appropriate hand hygiene and cough and sneezing etiquette
- appropriate cleaning practices are followed
- toys and equipment are cleaned and disinfected on a regular basis which is recorded in the toy cleaning register or cleaned immediately if a child who is unwell has mouthed or used these toys or resources
- additional cleaning will be implemented during any outbreak of an infectious illness or virus
- information regarding the health and wellbeing of a child or staff member is not shared with others unless consent has been provided, in writing, or provided the disclosure is required or authorised by law under relevant state/territory legislation (including Child Information Sharing Scheme [CISS] or the Family Violence Information Sharing Scheme [FVISS]).

FAMILIES WILL:

- adhere to the Service's policies regarding *Incident, Injury, Trauma and Illness*
- provide authorisation in the child's enrolment record for the approved provider, nominated supervisor or educator to seek medical treatment from a medical practitioner, hospital or ambulance service and if required, transportation by ambulance service
- provide up to date medical and contact information in case of an emergency
- provide emergency contact details and ensure details are kept up to date
- ensure that their child is able to be collected from the Service within a 30-minute timeframe if required due to illness by either a parent or emergency contact
- provide a copy of their child's medical management plans and update these annually or whenever medication/medical needs change
- adhere to recommended periods of exclusion if their child has a virus or infectious illness
- keep up to date with their child's immunisation, providing a copy of the updated AIR Immunisation History Statement to the Service following each immunisation on the National Immunisation Schedule
- complete documentation as requested by the educator and/or approved provider- *Incident, Injury, Trauma and Illness record* and acknowledge that they were made aware of the incident, injury, trauma or illness
- inform the Service if their child has an infectious disease or illness
- adhere to recommended periods of exclusion if their child has a virus or infectious illness-
- seek medical advice for their child's illness/fever/suspected infectious disease as required

- keep up to date with their child's immunisation, providing a copy of the updated AIR Immunisation History Statement to the Service following each immunisation on the National Immunisation Schedule
- complete documentation as requested by the educator and/or approved provider- *Incident, Injury, Trauma and Illness record* and acknowledge that they were made aware of the incident, injury, trauma or illness
- provide evidence as required from doctors or specialists that the child is fit to return to care if required- including post-surgery
- complete and acknowledge details in the *Administration of Medication Record* if required.

BREACH OF POLICY

Staff members or educators who fail to adhere to this policy may be in breach of their terms of employment and may face disciplinary action.

CONTINUOUS IMPROVEMENT/REFLECTION

The *Incident, Injury, Trauma and Illness Policy* will be evaluated and reviewed on an annual basis or earlier if there are changes to legislation, ACECQA guidance or incidences related to child safety or celebration practices. Feedback will be requested from children, families, staff, educators and management and notification of any change to policies will be made to families within 14 days.
